# Veeting

Branded Corporate Communication

GDPR Compliant Video Conferencing and Collaboration with Your Own Brand

Meet Face-to-Face Virtually Anywhere

Feature Rich Collaboration

Delight Your Customers and Work Efficiently

Our feature-rich web application is compatible with all web browsers on all desktop and mobile platforms. The collaboration features include document sharing, chat messages, screen sharing, whiteboards, text editing, polls, a video projector and high quality audio and video. As a Progressive Web App, it can be installed on your desktop and mobile device.

Different meeting room layouts, end-to-end encrypted meetings, boardrooms, and a TV mode for webinars make this web meeting platform an all-round solution for all the video conferencing needs of any business.

Hosted in Switzerland or self-hosted in your trusted data center, with Veeting Rooms you don't have to worry about data privacy issues. We never share your data with anyone.

AT A GLANCE
—

WHITE LABEL

Give your customers a seamless experience with your own brand and domain name.

INTEGRATIONS

Use our web components and APIs to build on our foundation.

CORPORATE FEATURES

Satisfy your Business and IT Departments.
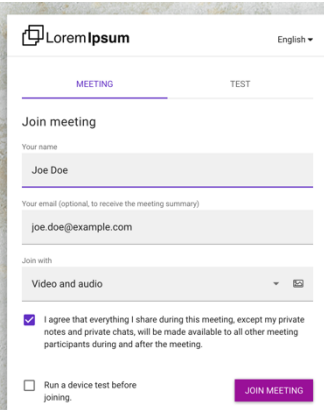

White Label

Our Platform with Your Brand and Domain Name

We rebrand our video conferencing system completely with your logo, colors, and domain name. Our company is not mentioned anywhere on the platform.

Veeting's white label video conferencing and web collaboration program is an industry first, and it has gained traction worldwide.

You will be inviting customers to your own virtual meeting rooms. Seeing your trusted brand instead of a generic video conferencing solution promotes your organization's image and reputation for service quality.

A white label product does not place any additional burden on your workforce. We maintain and run the platform for you while you concentrate on your core business.

Corporate Features

Satisfy your Business and IT Departments

Security, flexibility, and timely go-to-market are not mutually exclusive requirements. Veeting Rooms satisfies your IT and legal departments and lets you do business without any hassle.

Schedule your meetings with the branded Office 365 integration and invite your customers to your corporate online offices.

Do you have multiple business units with their own unique branding? No problem, we can provide you with as many branded White Label services as you need.

Active Directory integration, Two Factor Authentication and Meeting Authorization Services protect meetings from unwelcome guests. Complete in-transit encryption and private cloud setups ensure that your data is secure.

APIs and Web Components

Integrate and Expand Rapidly

The client-server architecture of our service gives you full API access to all available features. Whether you want to integrate Veeting Rooms into your billing system, LMS or CRM, our RESTful APIs and associated web-hooks make this a painless process.

Web components are small code snippets which web designers add to your website or application with just a few lines of code to enable video calls. You decide on the look and feel, we take care of the video infrastructure.
Meeting Types

A Veeting Room for Every Use Case

Not all meetings are the same. You choose the most appropriate room for each of your meetings, whether you require end-to-end encrypted communication, a large group discussion, breakout rooms or a webinar.

Off-the-Record meetings are designed for maximum security. This specialized option leverages Peer-to-Peer technology to run secure, fully end-to-end encrypted meetings.

Leverage the power of large *Boardroom* meetings to include more perspectives in your discussion. If you wish, you can use the facility to record the conversation for later use.

Support greater impact with the one-to-many configuration of a *Webinar*. Allow multiple presenters to share information with a large audience in a live, virtual setting. Use the option to add interpreters for a multi-lingual experience.

Testimonials

Customer and Partner Comments

«Veeting Rooms with its innovative approach and use of WebRTC standards is the perfect fit for our product line. Now our clients can get together easily in virtual meetings. » *Business VoIP Provider*

«With Veeting, we have found a reliable partner for webinars and breakout sessions that meets our high data protection and data privacy requirements. The Veeting Rooms solution can be integrated easily into our products and software solutions of our partner. Their white labelling options are impressive. » *Integrator*

«Web meetings are an important element of our sales process. We were looking for excellent customer service, data security and an always up to date solution. Veeting Rooms provides all of this. » *Enterprise User*

Data Privacy Without Exception

You Always Know Where Your Data Is

Veeting hosts its Veeting Rooms exclusively on servers located in Switzerland. We sign legally binding data processing agreements with customers to make sure everyone is GDPR compliant.

Partners who prefer to host their multi-tenant Veeting Rooms servers in their own data centers can make use of our on-premises and hybrid private cloud offerings. A Veeting Rooms setup is a closed system and does not depend on third-party services.
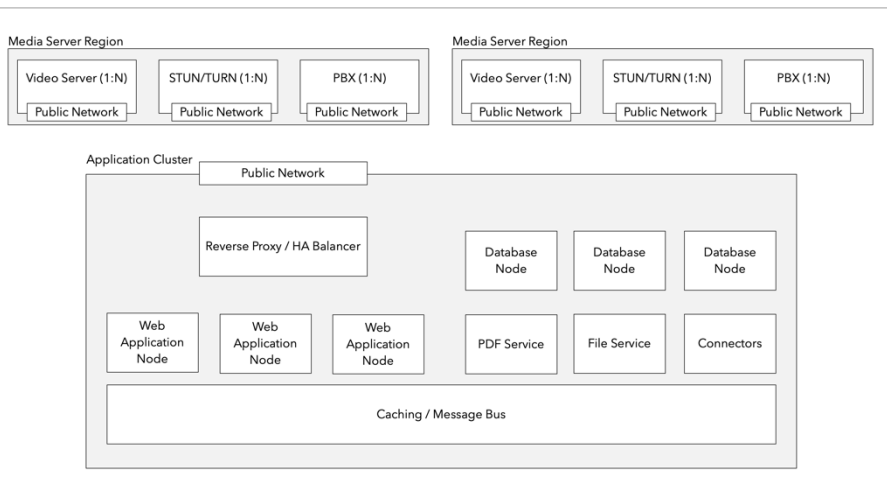

Scalable Infrastructure

Always Sufficient Resources to Meet Your Demand

Over the years we have solved the scaling challenge of the video platform. With 99.99% uptime, customers have never missed a single meeting.

We scale media servers horizontally to achieve high availability and fault tolerance and cluster all components on a high-performance cloud service.

Our Swiss servers are operated in an ISO 27001 certified data center managed by our trusted hosting provider. The entire video conferencing experience is a self-contained system that does not rely on third-party services.

WebRTC Since 2014

From Early Adapters to Industry Experts

Veeting was founded in 2014 with a singular vision: Enabling every company to have its own branded virtual meeting rooms and enjoy authenticated face-to-face communication and stress-free collaboration.

As early adopters of WebRTC, our team has built a video conferencing and web collaboration platform to the standards that provide the highest quality experience for users. Over the years, we have been privileged to collaborate with open-source experts, software integrators and enterprise organizations, to develop novel use cases and best-in-class solutions across a wide range of sectors.

Today, the Veeting platform supports virtual co-working, customer relationships and remote collaboration around the world. We are committed to providing reliable software solutions that allow customers and partners to create and brand their own virtual meeting rooms as simply as possible with as many features as required.

Services

Jump-Start Digitalization
